Sustainability

Our Commitment and Our Efforts

We are currently working on intensifying our commitments to sustainability. In a first step, we have written down our guidelines for active personal responsibility in the document "Active Ownership Principles". In the future, we will also present our commitment and coordination activities in a regular report.

The Sustainable Development Goals at Bonafide

By positioning itself in the fish & seafood sector, Bonafide makes a positive contribution in particular to the achievement of the following goals, with **life under water (14)** also addressing a development goal that is often neglected around the world:

Initiatives supported by Bonafide

ISS ESG ⊳

Together with our cooperation partner ISS ESG, we are working on improving the availability of sustainability data in our sector. Our first visible successes have been achieved by financing some ESG ratings. The rating coverage for our best-known fund, the Bonafide Global Fish Fund, was roughly doubled and is now almost 100%. The long-term goal is now to increase the rating coverage of the entire investment universe and also bring it to almost 100%. However, since ESG integration is still in its infancy and rating requirements are constantly changing, we expect this to be an ongoing process. Below you will find an illustration of the greatly improved availability for our largest fund, the Bonafide Global Fish Fund, as well as for the investment universe as a benchmark.

You can find more information about our cooperation partner ISS ESG here.

FAIRR is a global network of investors working on ESG issues in protein supply chains.

There is ample evidence that environmental, social and governance (ESG) issues can have a significant impact on the financial performance of industrialized livestock companies. While the most visible effects come from short-term events, the financial performance of companies in this sector also depends on longer-term environmental, social and regulatory trends, as well as the ability of companies to successfully anticipate and manage these changes.

Bonafide is a founding member of the Sustainable Blue Economy Initiative. The principles provide a framework for financing a sustainable marine economy and were developed by the European Commission, WWF, the World Resource Institute and the European Investment Bank.

Awards received

Two Bonafide funds received the 2021 FNG Seal for sustainable investments. The Bonafide Global Fish Fund and the Bonafide Investment Fund - Best Catches I were awarded the FNG seal and a star at the awards ceremony in Frankfurt.

Further information on the FNG seal can be found here.

The European transparency logo for sustainability funds indicates that Bonafide Wealth Management AG has agreed to provide correct, appropriate and timely information in order to give interested parties, in particular customers, the opportunity to understand the approaches and methods of sustainable investment in the respective fund.

Further information on the code can be found here.
